"after that paste this into /bin/ c4PtEJPV" - wait what ? :(
yeah its refers to pastebin :)

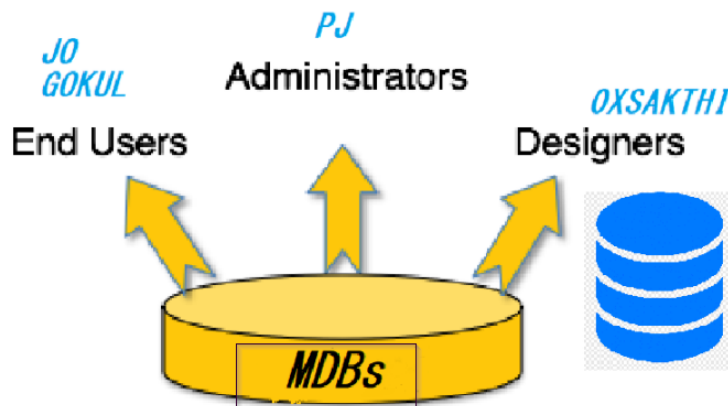

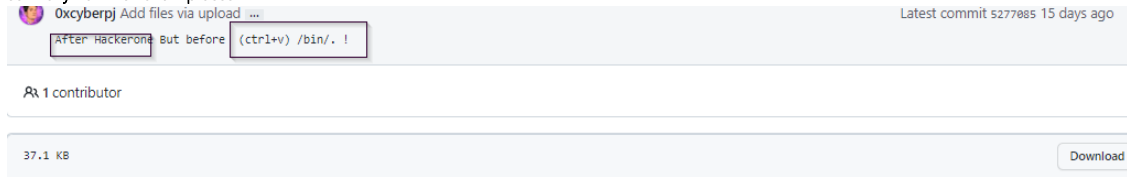

so pastebin.com/c4PtEJPV

we are in a right track

```
9 . X3I
```

so finally now we have 9 pieces

so from the comment the 9th piece is after hackerone.md and before pastebin!
have to change the order and what is the diagram refers to? - nothing
USUALLY ITS DBMS but here **MDBs** (take it)

so now

```
9 . MDBs
10. X3I
```

just two is remaining

11th one :

☐ 11= axe=685A326733

what is axe ? spell it wrong then hex (not a big deal)

hex --> decode

after decoding hex

```
11. hZ2g3
```

lets decrypt the already existing pieces

base64 --> decode:

```
TamilCTF{y34_g!7hub_i5_c00l_r!gh7}
```

what is the missing one? : }

just add it

else goto aidenpearce twitter id and get it from bio
